COMP4878-9 Digital Platform for Telemedicine

Test cases — Ma Chun Kit (23230215) — 10 November 2026

The Result column Pass means flutter test completed that case on 10 November 2026 (27 passed, 0 failed). A case marked Designed was checked in the source and was not clicked against a live API in this run. Start the API with npm start from the backend folder before a live click-through.

ID	Case	Steps	Expected	Result
TC-01	Startup	Open the app and wait for the startup animation.	The sign-in screen appears.	Pass
TC-02	Welcome	Sign in with a valid account.	A welcome with the username appears, then home.	Pass
TC-03	Login language	On the sign-in card, choose Traditional Chinese.	The sign-in label becomes ■■.	Pass
TC-04	Empty sign-in	Submit the sign-in form with both fields empty.	The form asks for both fields.	Pass
TC-05	Wrong password	Submit a username with the wrong password.	The person stays on the sign-in screen.	Pass
TC-06	Admin path	Sign in as admin, open a tab, then log out.	The dashboard opens and logout returns to sign-in.	Pass
TC-07	Payment tile	On home, open Payment.	The tile says the service is not available yet.	Pass
TC-08	Easy mode	Turn on easy mode and look at home and the tab bar.	Four large actions remain. Meetings is not a tab.	Pass
TC-09	Wide layout	Use a window at least 840 px wide.	The side rail is used.	Pass
TC-10	Map pin	Open the delivery map widget.	The headquarters pin is Hong Kong Baptist University.	Pass
TC-11	Facilities file	Load the saved clinic and hospital file.	77 clinics have hours and 44 hospitals are listed.	Pass
TC-12	Sign-up	Create an account, tick the course notice, and use a new username.	Home opens. A taken username is rejected.	Pass
TC-13	Settings	Save a description, switch dark mode, and add an allergy.	The values stay. A mismatched password is rejected.	Pass
TC-14	Appointment filters	Search, filter by doctor type, and sort the open times.	Matching rows remain and the order follows the sort.	Pass
TC-15	Hosted meeting	Parse a live meeting whose canEnter flag is false.	The meeting stays on the list and cannot be entered yet.	Pass
TC-16	Visit warning	Read a completed visit whose note names ibuprofen.	medicineWarning is true and the doctor rating is kept.	Pass
TC-17	Confirm booking	Patient writes a reason, then opens the confirmation page.	The visit is saved only after Confirm booking. A pending HKD 0 payment row is written. PayPal is not called.	Designed
TC-18	Free cancel	Patient cancels a visit that is at least one day away.	The dialog says the cancellation is free. The time opens again.	Designed
TC-19	Complete visit	Doctor marks a booked visit completed and writes a note.	The patient sees status completed and the note.	Designed
TC-20	Rate visit	Patient chooses 1 to 5 stars on a completed visit.	The rating is stored once. A second rating is rejected.	Designed
TC-21	Medicine order	Doctor creates an order, then advances it twice.	Status moves preparing, in transit, delivered. Destination is the saved address.	Designed
TC-22	Health reading	Patient types a heart rate and saves it.	The new reading is listed. A wearable is not read.	Designed
TC-23	App guide	Open the guide tile.	Three fixed answers appear. The HKBU API is not called.	Designed

Backend syntax for the appointment, meeting, delivery, and health-reading route files was checked with node --check on the same day. That check does not connect to MongoDB.
